If you **run the app on the background** your iPhone will ask for one more confirmation.
Click to **Change to Always Allow.** This settings is intended to
share the position data with the app in background and an **active load or delivery operation.**

Ambrogio app will not use ask or use your position when you are not actively tracking.

IMPORTANT

- **None of your personal data is collected nor shared.**

- The app internet data consumption is **very low**.

Thank you for your support in providing a better service to our customers!
